Objective

Systems Analysis and Development student with a focus on backend development. I have knowledge in **Java, Spring Boot, SQL (MySQL, Postgres), JavaScript, C#, C/C++, Docker, Postman, and DBeaver**. I'm seeking an opportunity as a junior or intern developer to apply and further develop my skills in API development, databases, and backend architecture. I'm eager to learn best practices, agile methodologies, and contribute to building efficient and scalable systems.

Technical skills

Frontend: JavaScript, HTML, CSS, Bootstrap

Backend: Java (Spring Boot, JPA, JDBC), C#, C/C++

Databases: PostgreSQL, MySQL

Technologies and and tools: Docker, Postman, Dbeaver, Figma, Git/Github

Projects

Easy Order API: API RESTful | Java, Spring Boot, JPA/Hibernate, Maven, H2, PostgreSQL, Postman

The Easy Order API is a RESTful API built with Spring Boot for managing products. It supports full CRUD operations and includes data validation through the use of DTOs (Data Transfer Objects).

- **GET:/users/1:** Returns the user with ID '1'.
- **GET:/orders:** Retrieve all orders.
- **POST:/users:** Creates a new user in the database.
- **PUT:/users/1:** Update the data of the user with ID '1'.
- **DELETE:/users/1:** Deletes the user with ID '1' from the database.
- **DELETE:/orders:** Deletes all orders from the database.

DSlist: API REST | Java, Spring Boot, JPA/Hibernate, Maven, PostgreSQL, Docker

The DSlist project is a REST API that manages information about games and their specifications, including name, genre, rating, image, short and long descriptions. This API provides the following endpoints:

- **GET:/lists:** Returns all game lists, categorized by different genres.
- **GET:/lists/2/games:** Retrieves all games in the list identified by ID '2'.
- **GET:/games/2:** Returns specific information about the game with ID '2'.
- **POST:/lists/2/replacement:** Allows the user to reorder the position of a game within the specified list.

Education

Faculty of Technology of Itapetininga (FATEC-ITA)

Feb 2024 – Dec 2026

Bachelor of Technology (CST) – Systems Analysis and Development

Academic Performance Index (API): 8.16 / 10.00

Relevant courses: Programming Logic and Algorithms, Object-Oriented Programming, Databases, Web Development, Mobile Development, Data Structures, Software Engineering, Operating Systems, Computer Networks, Artificial Intelligence, Information Security.

Languages – A1/A2: Basic user | B1/B2: Independent user | C1/C2: Advanced user

- **Portuguese:** Native (C2)
- **English:** Upper-intermediate (EFSET Certification: Listening C1, Reading C1, Writing B2, Speaking B2)
